LOCAL ARRANGEMENTS

ABOUT THE WORKSHOP

MetroAeroSpace aims to gather people who work in developing instrumentation and measurement methods for aerospace. Attention is paid, but not limited to, new technology for metrology-assisted production in aerospace industry, aircraft component measurement, sensors and associated signal conditioning for aerospace, and calibration methods for electronic test and measurement for aerospace.

WORKSHOP TOPICS

The main topics include, but are not limited to:

- Electronic instrumentation for aerospace
- Automatic test equipment for aerospace
- Sensors and sensor systems for aerospace applications
- Wireless sensor networks in aerospace
- Attitude - and heading - reference systems
- Monitoring systems in aerospace
- Metrology for navigation and precise positioning

PAPER SUBMISSION

Paper submission will be handled electronically, through the submission page set up on the conference web page: www.metroaerospace.org

The best contributions will be awarded, including the Best Student Paper Award and the Best Paper authored and presented by a woman.

Special sessions will be organized on specific topics, see online at:

www.metroaerospace.org/special-session

IMPORTANT DATES

- **January 26, 2018** – Submission of Extended Abstract
- **April 15, 2018** – Notification of Acceptance
- **May 20, 2018** – Submission of Final Paper
