VIRTUAL CONFERENCE / JUNE 23-25, 2021

Exhibitor and Sponsor Prospectus

IEEE MetroAeroSpace 2021 will be held virtually, June 23 - 25, 2021

Since the first edition, MetroAeroSpace represents an international meeting place in the world of research in the field of metrology for aerospace involving national and international institutions and academia in a discussion on the state-of-the-art concerning issues that require a joint approach by experts of measurement instrumentation and industrial testing, typically professional engineers, and experts in innovation metrology, typically academics.

This 8th edition will keep pursuing the state of the art and practice started over the past years. Attention is paid, but not limited to, new technology for metrology-assisted production in aerospace industry, aircraft component measurement, sensors and associated signal conditioning for aerospace, and calibration methods for electronic test and measurement for aerospace.

As a virtual conference, MetroAeroSpace 2021 will offer exhibitors and sponsors great opportunities to promote and showcase their latest products, technologies and technical presentations via online engagement with conference delegates through sharing the same 'virtual conference' digital platform which delegates will use. This is a great opportunity for international networking with delegates. A range of packages are available, please turn over for more details and contact the Conference Manager to make a booking or if you have any queries or wish to receive more information.
